

AELITE

Series

(((AE)))

ACOUSTIC ENERGY

Overview

The Aelite Series is Acoustic Energy's affordable high-end loudspeaker range.

Using unique, modern techniques in drive unit technology and cabinet enclosure construction, the Aelite Series is designed to produce the highest quality audio reproduction from any analogue or digital source, whilst easily integrating within today's lifestyle home environment.

Engineered by AE to give exceptional performance with music or film.

Technology

The Aelite Series offer some of the most cutting-edge developments currently available in loudspeaker technology:

Aluminium drivers -
Heat creates distortion in loudspeaker drivers - we dissipate as much heat as possible through our cone assembly meaning you can listen louder, for longer.

Curved cabinet construction -
Minimising harmful standing waves and vibration through the enclosure. This means lower colouration, more natural sound.
