

# ADVANCE INFORMATION: BT2 BLUETOOTH

Bluetooth has become one of the most important connection methods in the audio industry. A genuinely open standard supported by millions of devices, recent innovations have seen it move beyond simple convenience and become a credible means of delivering hifi quality. To take advantage of this Acoustic Energy has developed a new series of Bluetooth speakers. The first of which, the BT2 features an aluminium chassis, rubber push button controls and a clean, understated aesthetic. Bluetooth 4.2 with apt-X Low Latency for optimal performance, is also supported.

The BT2 is capable of a convincing stereo image in its own right. Featuring USB phone charging and a microphone for hands free calling for real world versatility. This is backed up by long battery life of over 20 hours, making the BT2 a perfect partner for everyday use.
